Would you hire a babysitter obsessed with violence?

Child care with TV's and VCR's is a terrible temptation.

Television is so useful to parents. How can you resist? It's not easy but you owe it to your children, your family and yourself to resist this temptation as best you can.

Violent movie advertisements and violent programs make violence normal. Television shows violence as the common method for solving problems. Local TV news confirms the violent world picture.

As consumption of television and VCR babysitting deprive children of their natural discovery of the world, we all must try to reduce unattended child TV watching.

Television's invasion of childhood is a hazard to the health of our country and our culture. The solution to TV violence lies in the action of individuals. Impose limits. It's your house & your family.

MyTV
I impose limits
